

ADVANCE TRADING TUTORIAL

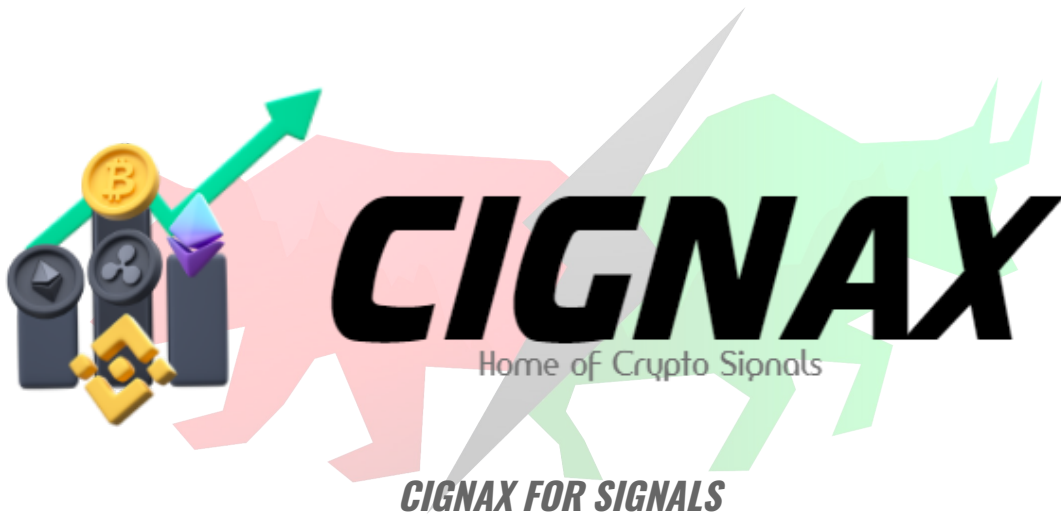

MAKE MONEY FROM CRYPTO TRADING FOR REAL

The image is a collage representing cryptocurrency trading. It features several physical coins: a Bitcoin, a Dogecoin, and a Shiba Inu (\$SHIB) coin. In the bottom left, a smartphone displays a trading interface with a candlestick chart and order book details. The interface includes a search icon, a 'Buy' button, a price of 60995.00, and 'Ask Size: 2'. Below the chart, there are indicators for 'Spreads' and 'Level II'. The background of the collage is a technical analysis chart with dashed lines and arrows, showing price levels such as 100, 95, 95.50, and 97.25. Text on the chart includes 'Long a 95 put -2.25; long a' and 'en prices'. At the bottom center, the text 'CIGNAX VOL 1' is displayed in a bold, yellow font.

7. CONCLUSION

This strategy performs tremendously when you are able to follow our outlined instructions on useful indicators and perfect entry and exit positions. The ability to predict current and changes in market directions over a short and long term period of time with the aid of necessary indicators is what has made this strategy a perfect solution for the volatile nature of cryptocurrency trading.

The strategy that was given in this advance trading tutorial work took over 4 years of trials and series of (back) testing against possibility of trade loss and the cause of those losses back then further lead to the modification and advancement of this recommended strategy today in this advance tutorial today.

The major aim of this strategy is to assist you with more winnings possibilities and much more chances of realizing high volume of profits from your trading activities with lesser or no liquidated trades.

This strategy best performs at a leverage range of between 1 - 10x entering into a futures trading position, using a proper entry and exit point but not suitable for all assets due to market status variation.
